IBM acquires SaaS firm Prescinto

PEERZADA ABRAR
Bengaluru, 15 October

Tech giant IBM said it has acquired Bengaluru-headquartered Prescinto, a leading provider of asset performance management software-as-a-service (SaaS) for renewables.

Prescinto's capabilities leverage AI to enable advanced monitoring, analytics, and automation to streamline renewable energy operations and manage clean energy and storage assets. This is IBM's fourth acquisition of an Indian company. IBM's last acquisition in India was in 2016, when it bought Bengaluru-based Cloud-computing company Sanovi Technologies.

The acquisition of Prescinto will enhance the capabilities of IBM Maximo Application Suite, IBM's solution for asset lifecycle management. It will further IBM's leadership in the energy and utility space, an industry undergoing significant transformation and seeking solutions to manage and optimise wind, solar, and other renewable energy storage assets.

Framework for Cloud-driven AI needed: Jio exec

SUBHAYAN CHAKRABORTY
New Delhi, 15 October

A general framework prioritising cloud-driven artificial intelligence (AI) and storing data in the country will be needed to fully utilise the potential of AI in India, according to a top Reliance Jio executive.

Speaking to reporters on the sidelines of the India Mobile Congress, he said Jio envisioned AI-services expanding to all sectors with wide-ranging use cases across education, health care, and retail. "AI will change everything, not just telecom. For that AI Cloud is needed as a framework. If you do not have access to every premise, do not have storage, do not have modern features running on AI-Cloud, India will remain behind," he said.

Developed internally, Jio's AI modelling tools are aimed at connecting a variety of devices connected to Cloud. The company already holds the proprietary technology to connect these devices, according to him.

High on Cloud
Jio envisions a situation where

JIO'S VISION OF A 'DIGITAL SOCIETY'

- To reduce prices, customer devices should have less processing power
- Powerful edge data centres with low latency connectivity to step in
- Diverse sectors to have untapped AI use cases
- AI-driven business services to be provided to small businesses
- Device, technology, and application integration ready for this

customer-premises equipment is reduced in capacity, which cuts cost and does more than half the data processing on Cloud.

"Most in-hand or at-home devices are expensive. The processing power of such devices should be reduced. Instead, data-processing capabilities should be pushed to cloud, with the use of edge data centres, which provide low-latency connectivity and the network should be made intelligent," he said.

He pointed to the telco's low-price internet-enabled range of JioBharat phones, which has a limited memory and processing power, but can

still render 750 TV channels as a result of the cloud connection. In education AI can help students in government schools with poorer access to resources, and easily use a screen to tinker with how the lander of the Indian Space Research Organisation can be brought down on the moon.

Jio wants to provide AI-driven service to small enterprises such as automatic customer identification and messaging tools at affordable monthly subscription rates.

The huge amount of data generated as a result will be valuable commercially and should not move out of India, Jio says.

DGCA removes 'enhanced surveillance' on SpiceJet

DEEPAK PATEL
New Delhi, 15 October

The Directorate General of Civil Aviation (DGCA) on Tuesday removed SpiceJet from "enhanced surveillance" after the airline successfully raised ₹3,000 crore through a qualified institutional placement (QIP) process. The regulator will continue to conduct random spot checks of SpiceJet's operational aircraft to ensure safety.

"Spicejet was placed under enhanced surveillance by the DGCA on September 13 in view of the financial constraints being faced by the operator which could potentially affect discharge of mandatory obligations of aircraft maintenance," said the DGCA in a press release.

The DGCA carried out 266 spot checks at various locations as part of the enhanced surveillance mechanism.

"It has been ensured that deficiencies and findings found during the spot checks have been subject to suitable rectification action by the operator. In light of the same and the financial infusion of additional funds into the company, Spicejet has been taken off the enhanced surveillance regime," it noted.

"However, random spot checks shall continue to be carried out across the oper-

SpiceJet's market share shrinks to 2%

The domestic passenger market share of low-cost airline SpiceJet has shrunk to just two per cent in September this year, down from 7.3 per cent in January last year, data released by the Directorate General of Civil Aviation revealed on Tuesday. Overall, the Indian carriers carried a total of 13.027 million domestic passengers, which was 6.38 per cent more year-on-year. The domestic passenger market share of IndiGo, India's largest airline, stood at 63 per cent in the past month.

DEEPAK PATEL

ational fleet to ensure continuing safety of operations," it clarified. On September 23, ten days after it was put under enhanced surveillance, the airline had raised ₹3,000 crore from global investors and mutual funds through the QIP process. *Business Standard* reported last week that the airline has informed the regulator that it will spend ₹400 crore within the next 24 months to bring its 36 grounded planes back to service.

PVR Inox to find its comeback role in Q4, says CFO

ROSHNI SHEKHAR
Mumbai, 15 October

PVR Inox, India's largest film exhibitor, is banking on the anticipated success of its lineup of multi-starrer movies, including *Singham Again*, *Bhool Bhulaiyaa 3*, and *Pushpa 2: The Rule* (the Allu Arjun starrer will be released in five languages), to restore profitability.

"Going forward, I think with the recovery in admissions and a very strong lineup of films in the festival season and fourth quarter, we expect footfall and occupancy to improve substantially, which will have a positive impact on profitability," said Gaurav Sharma, chief financial officer of PVR Inox, in an interview with *Business Standard*.

The multiplex chain reported a consolidated net loss of ₹11.8 crore for the quarter ended September, compared with a net profit of ₹166.3 crore in the same quarter last year. The company's net loss stood at ₹179 crore in the April-June quarter. The company's consolidated revenue from operations dropped by around 19 per cent to ₹1,622.1 crore, down from ₹1,999.9 crore in the same quarter last year.

"Last week, we had *Vicky Vidya Ka Woh Wala Video* and *Jigra* performing well at the cinemas," said Sanjeev Kumar, executive director of PVR Inox, during the earnings call. The company expects a higher number of Hollywood movies to be released in the ongoing quarter and in 2025 compared to 2023, as last year's Hollywood releases were disrupted due to the Writers

Hopeful that the second half is much stronger, said Gaurav Sharma, chief financial officer, PVR Inox

Guild of America strike. The company also expects the return of blockbuster movies next year, according to executives in the earnings call with analysts. Earlier, the company announced that movie re-releases would become a major part of its business model, which contributed roughly 6 per cent of the company's second-quarter admissions.

The company reduced its net debt by ₹140.9 crore in the last quarter, bringing its net debt to ₹1,153.1 crore at the end of September.

The success of *Street 2*, which emerged as the highest-grossing Hindi film, was significant to PVR Inox's performance in the July-September quarter.

The company plans to add 110-120 screens in 2024-25 (FY25), having already added 71 screens to date. It also plans to shut down 30-35 low-performing screens in H2FY25. Currently, the company's overall screen portfolio includes 1,747 screens in 356 cinemas across 111 cities in India and Sri Lanka.

Avaada Energy closes ₹597 crore refinancing for its solar projects

PEERZADA ABRAR
Bengaluru, 15 October

Avaada Energy, an arm of Avaada Group, said it has closed approximately ₹597 crore (\$71.1 Million) in refinancing for its commercial and industrial (C&I) solar projects in the states of Karnataka and Maharashtra. The refinancing was secured from NIIIF Infrastructure Finance

Limited (NIIIF IFL), an infrastructure debt fund dedicated to refinancing operational infrastructure projects.

Avaada's solar projects currently supply electricity to various leading corporations in the country, including Bharti Airtel, Motherson, Bharat Forge, STT, Nxta Data and Lumax, supporting them in their energy transition goals.
